Setting the wheel / tyre size without VagCom

If you do not have access to a VagCom unit, and you do not want to pay VW to code your unit, you can set the speed pulse parameter without VagCom in the following way,

From the Navigation menu (as the photograph) press the 3 and the 6 button simultaneously

<http://www.vwnavi.co.uk>

The following screen will appear displaying the software status of the unit and the hardware status

Screen 1

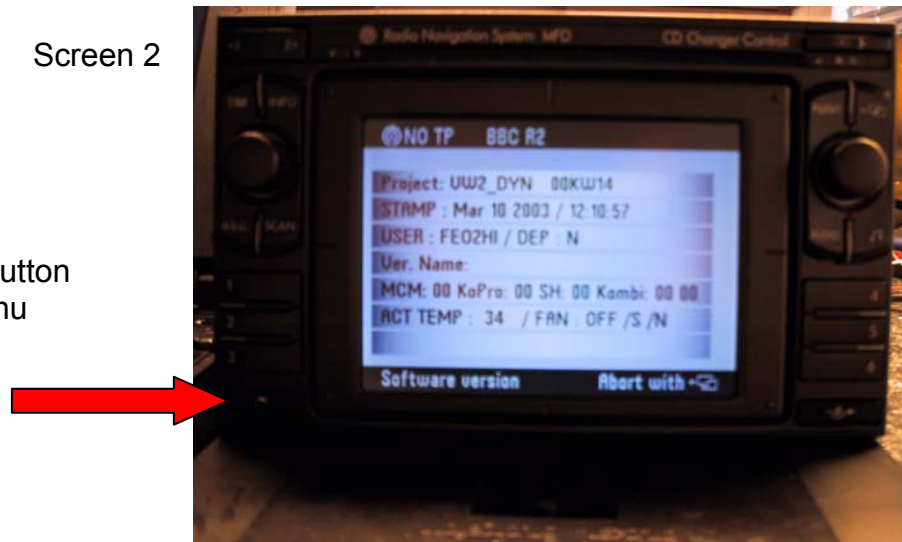

Rotate the menu
select button to adjust
the contrast

Press for screen 2

Screen 2

Press the “Flag” button
for the setting menu

Menu select button,
rotate to select,
press to enter

Select Tyre circumference and press enter

Dial in the tyre circumference as per the attached table, and press enter,

Value	Tyre Size
1935	195/65 R15
1910	205/60 R15
1930	205/55 R16
1930	225/45 R17
1937	255/35 R18
1895	185/65 R15
1935	195/65 R15

Select Puses per rev and press enter

Dial in the pulses as follows, for Gala speed signal use 8, for ABS connection use 43, press enter, press end to save and exit. Job Done
